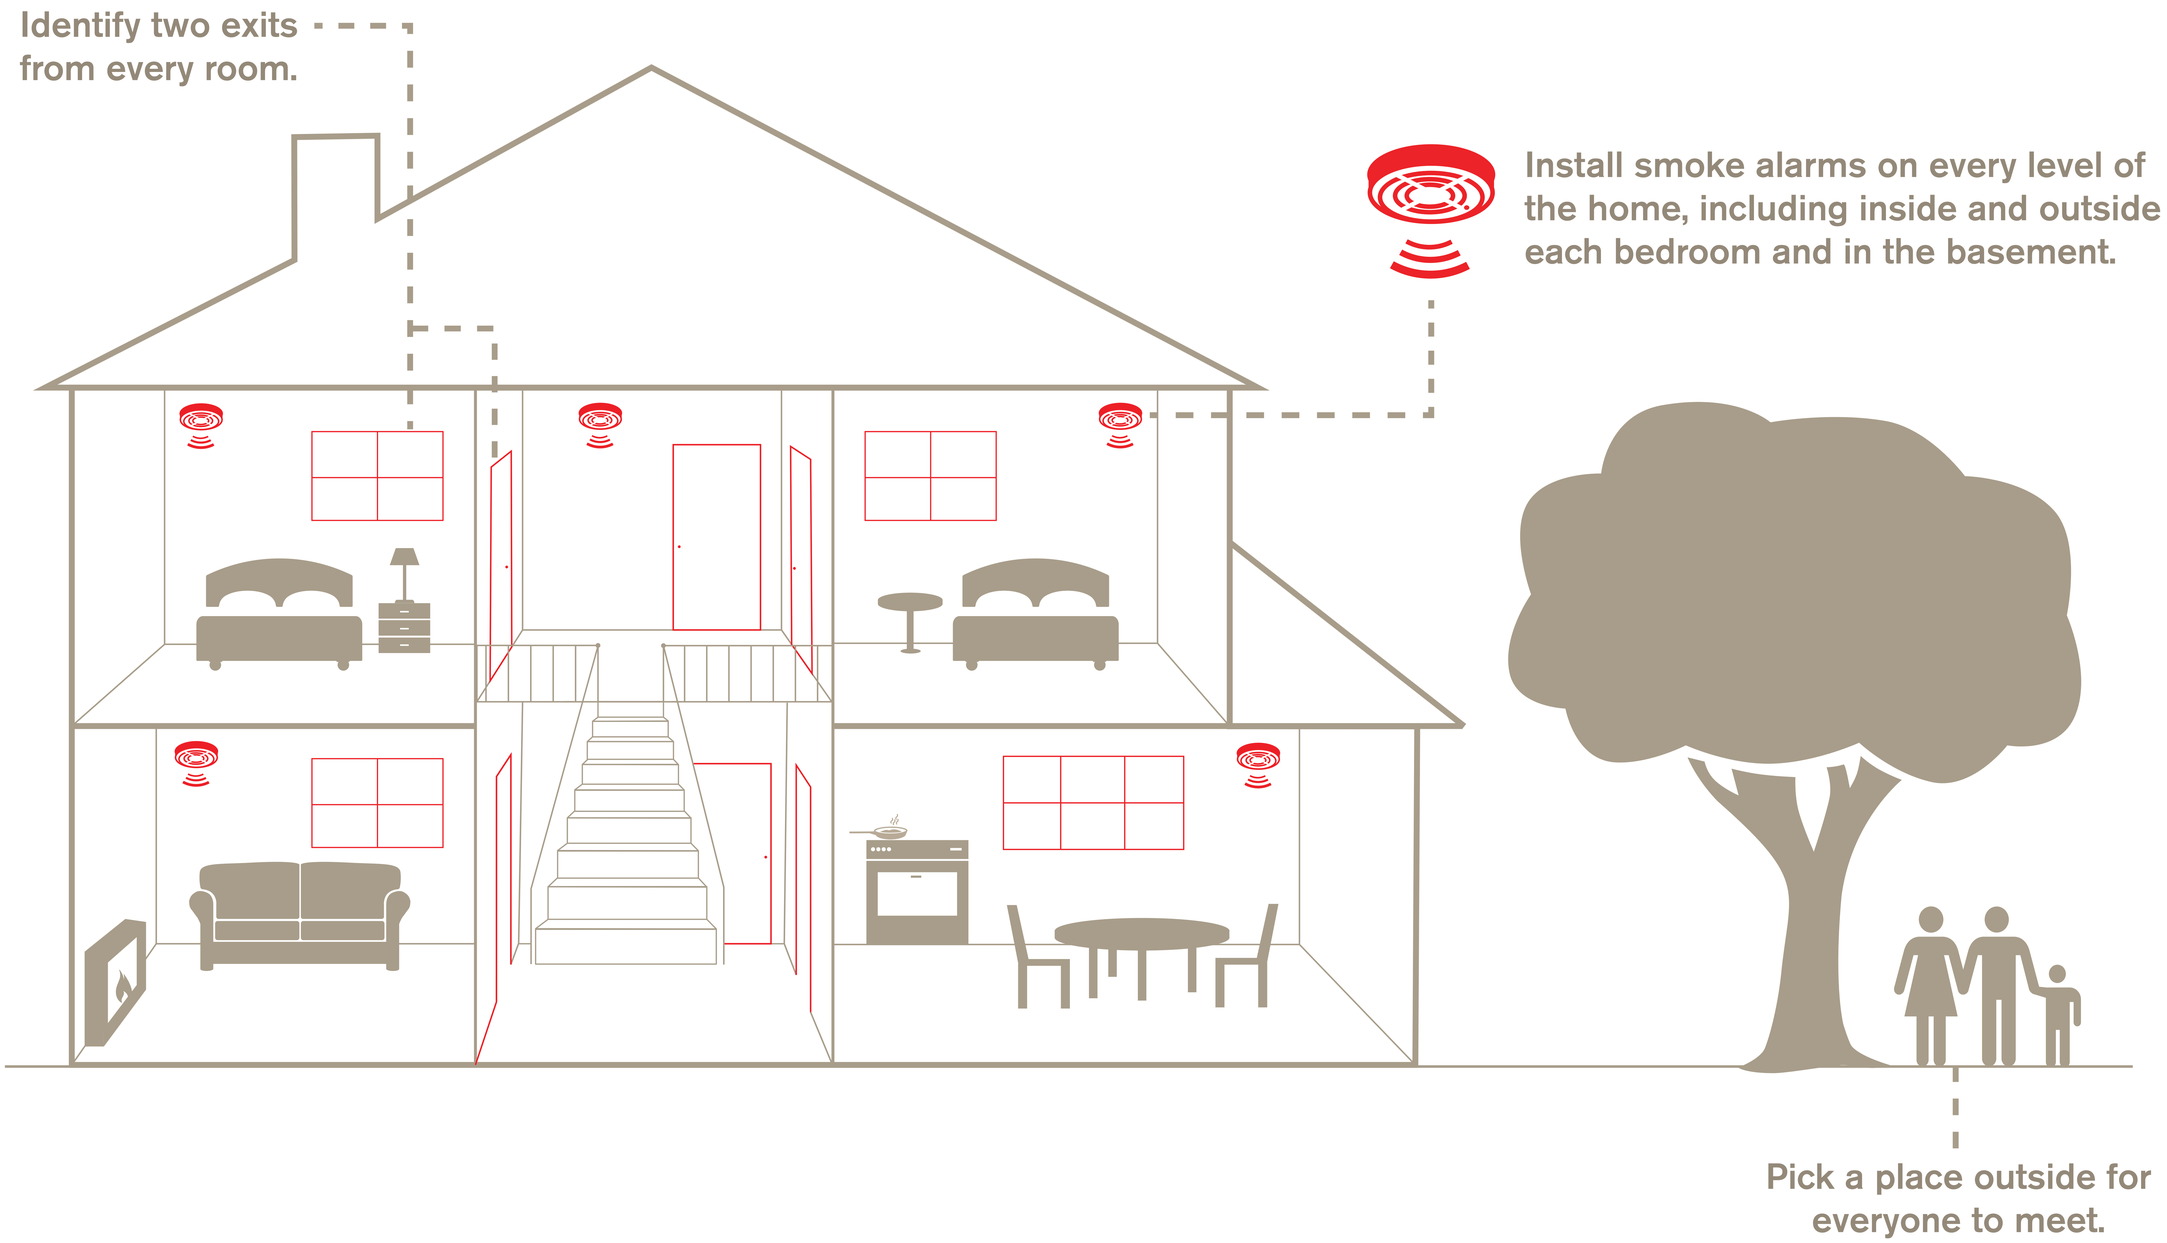
Mapping Out Your Escape Plan:
Single Family Home



Did you know that if a fire starts in your home, you'll have just two minutes to escape? That's why it's important to have working smoke alarms in your home, develop an escape plan and practice that plan. Practice your plan until everyone in the household can evacuate in less than two minutes. Test smoke alarms every month and replace the batteries as needed.

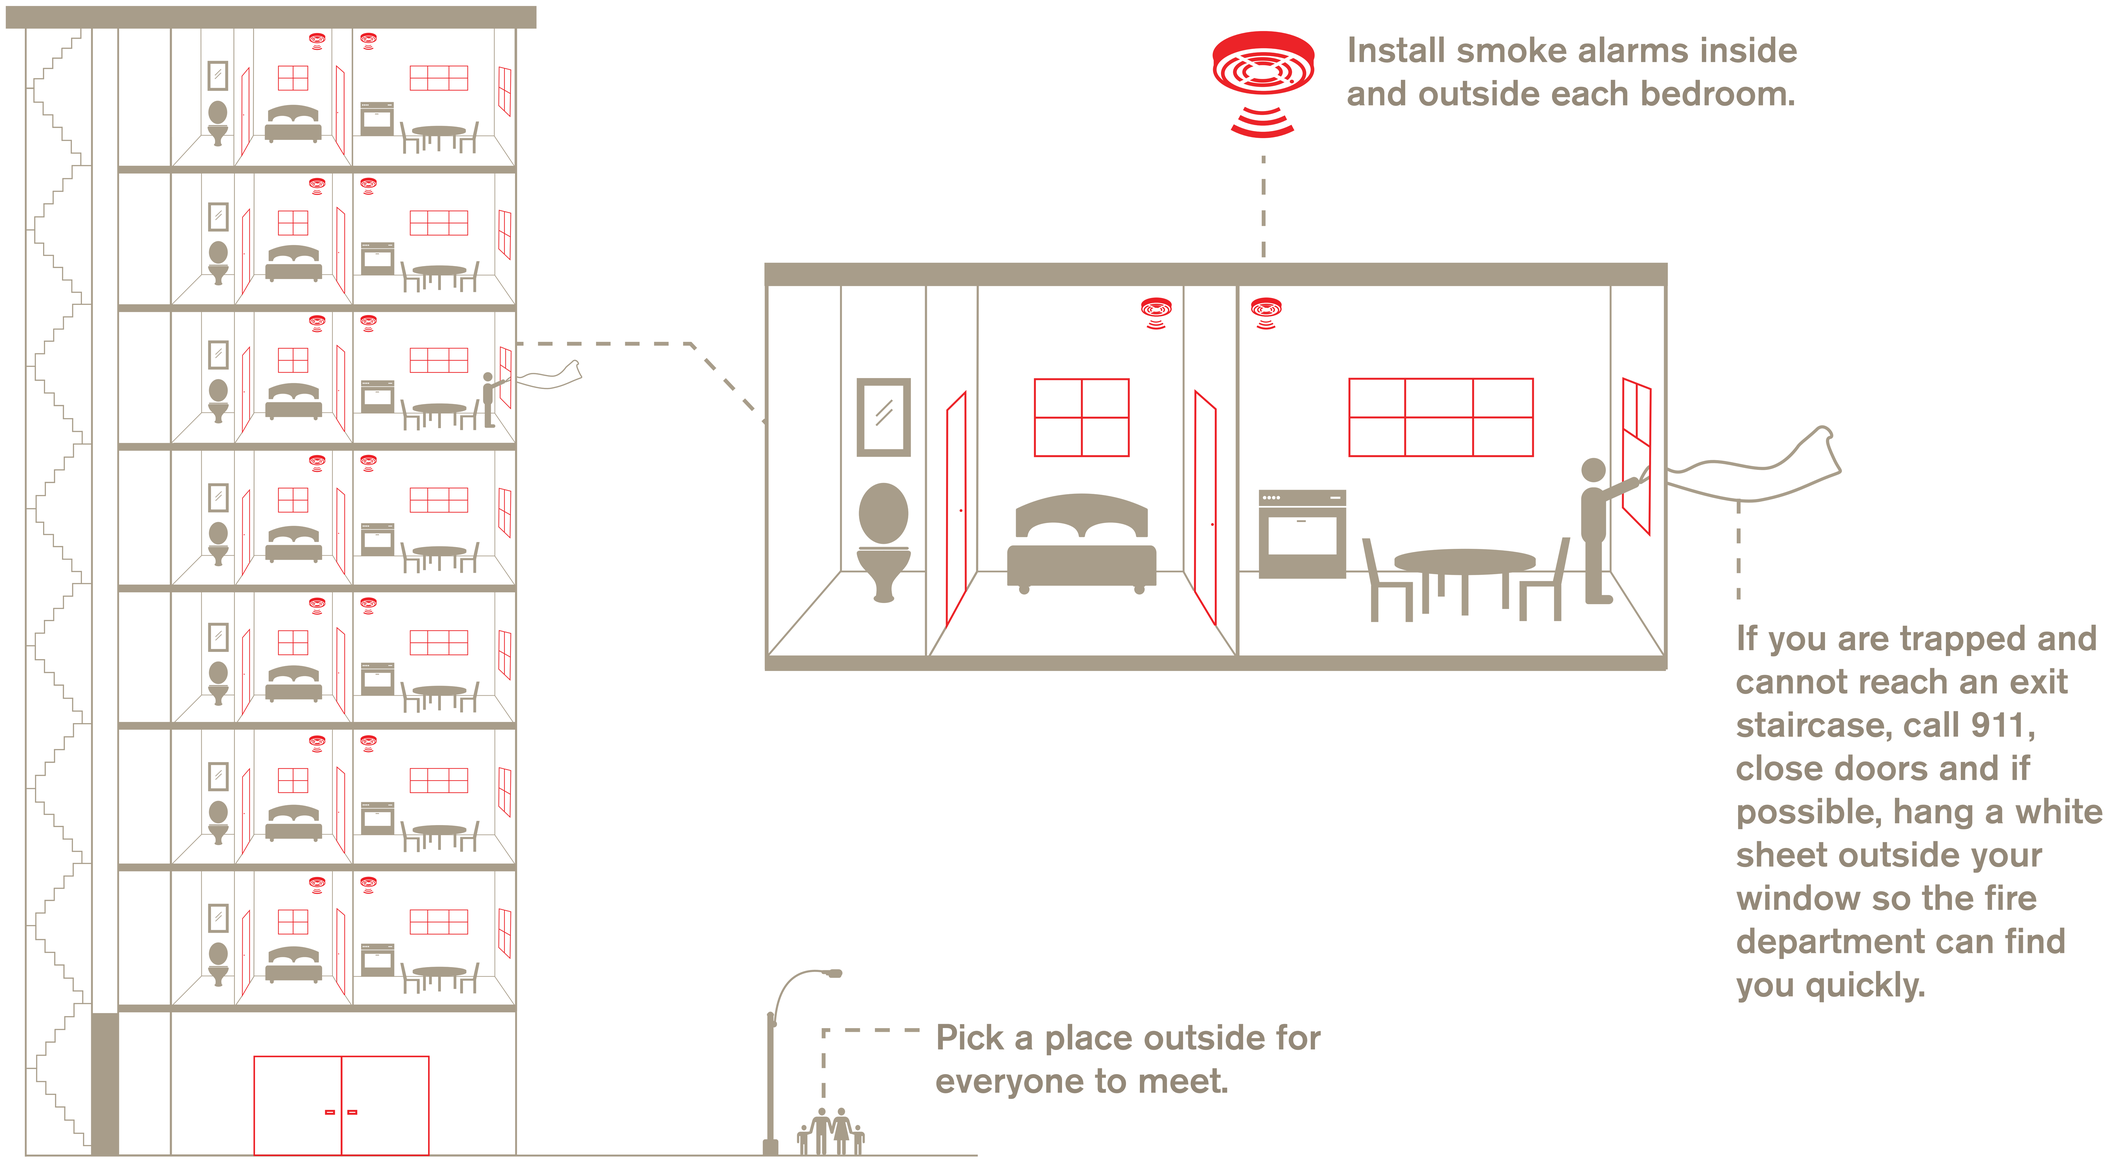
Mapping Out Your Escape Plan:
High-Rise Apartment Complex



Did you know that if a fire starts in your home, you'll have just two minutes to escape? That's why it's important to have working smoke alarms in your home, develop an escape plan and practice that plan. Practice your plan until everyone in the household can get to a safe place—either the interior fire stairs of your building or a safe place in your unit--in less than two minutes. Test smoke alarms every month and replace the batteries as needed.

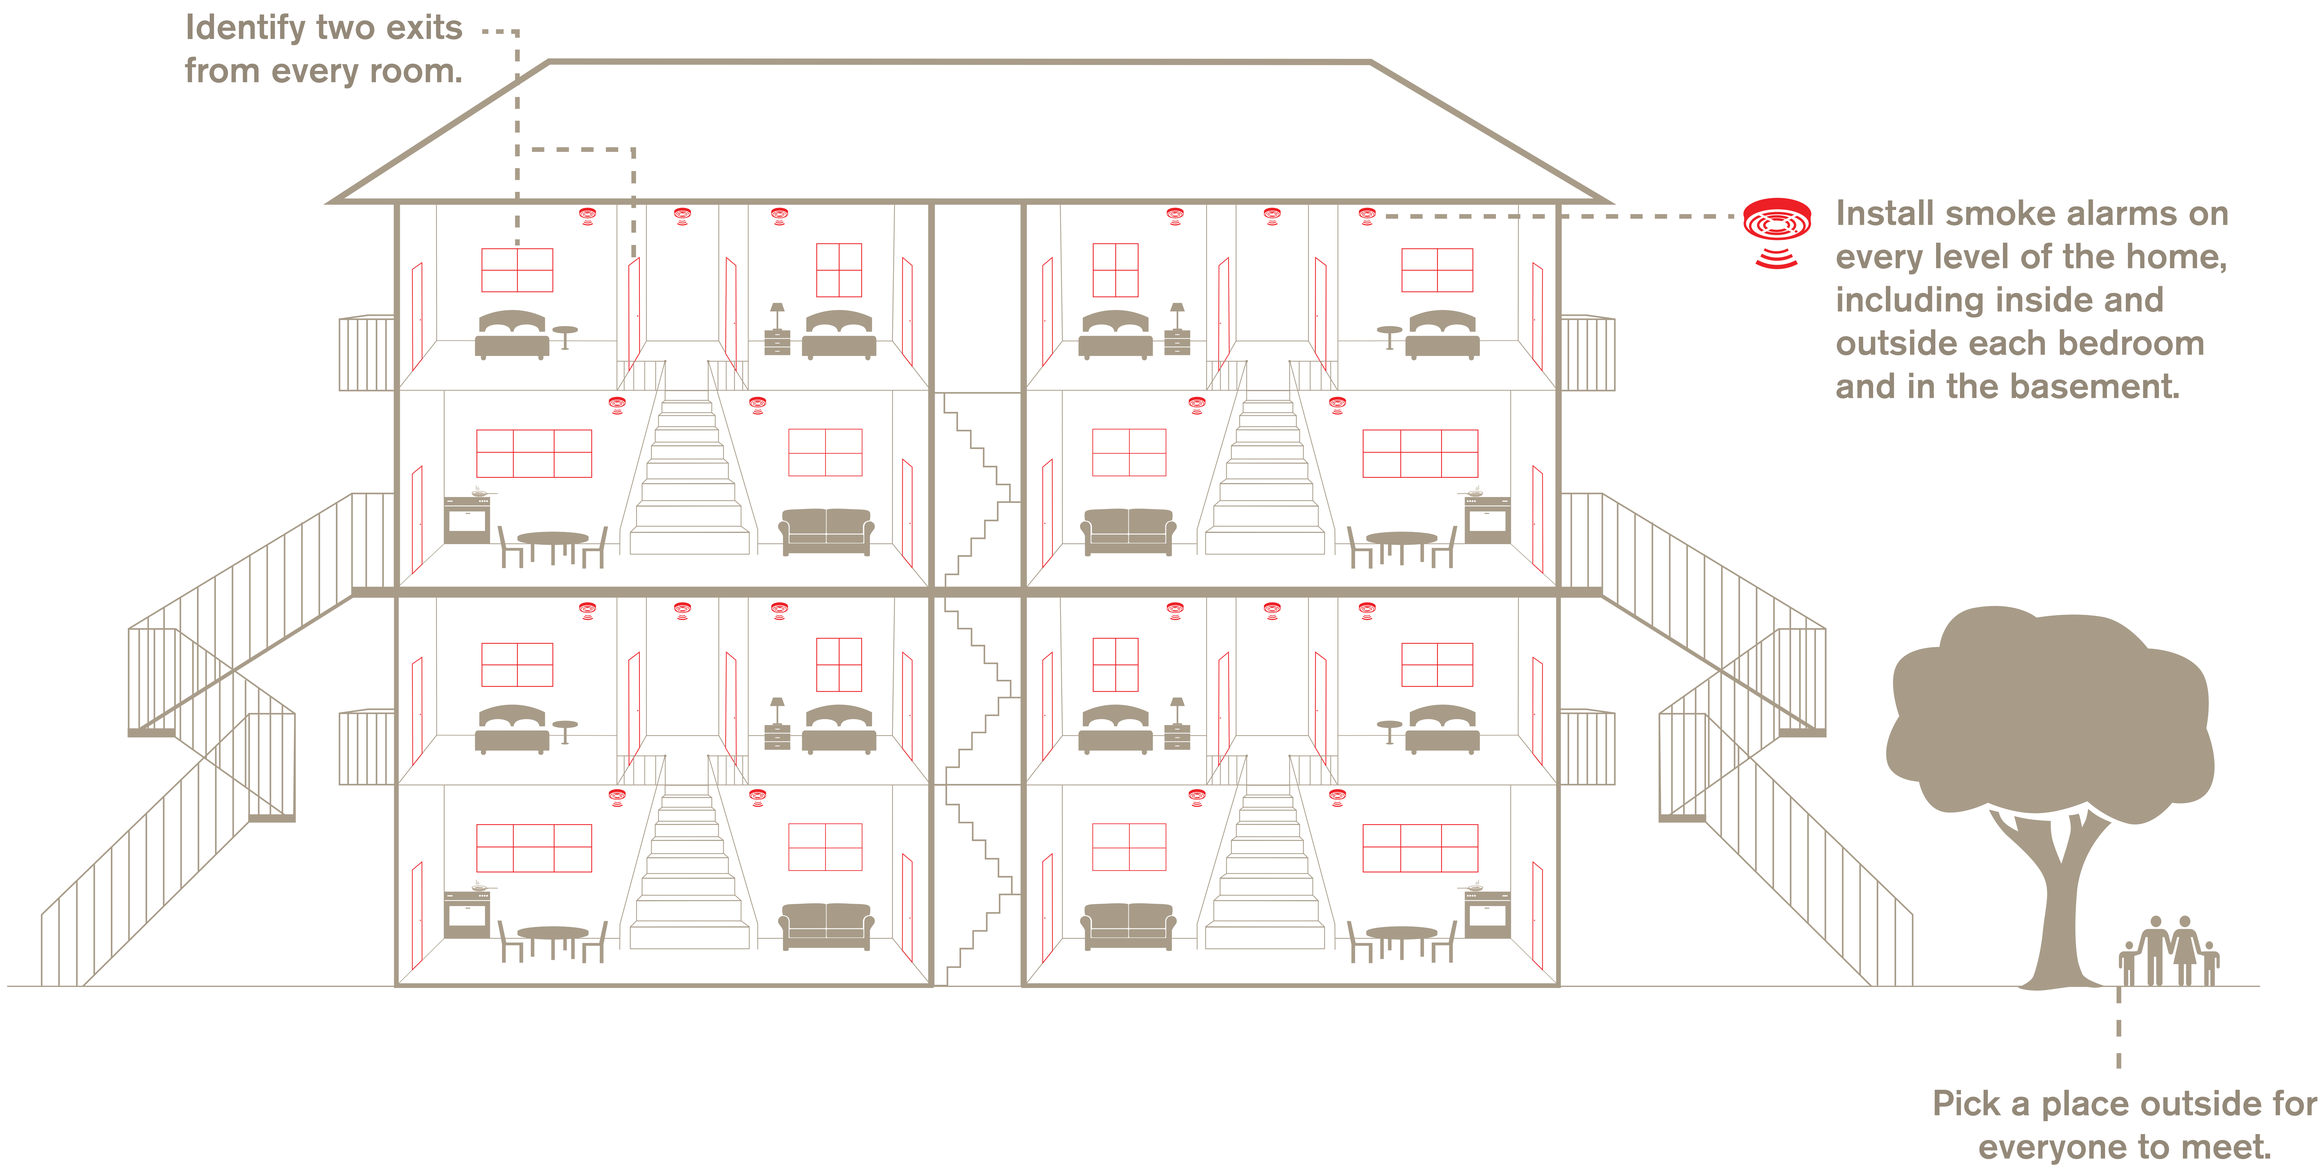
Mapping Out Your Escape Plan:
Multi-Family Dwelling



Did you know that if a fire starts in your home, you'll have just two minutes to escape? That's why it's important to have working smoke alarms in your home, develop an escape plan and practice that plan. Practice your plan until everyone in the household can evacuate in less than two minutes. Test smoke alarms every month and replace the batteries as needed. Consider placing escape ladders in rooms on upper floors.
